

Data Sheet

Temporary Protection Sheet

Description

- 100% recycled LDPE
- Suitable for most typical and external temporary protection applications
- Can be used for a variety of applications including environmental protection such as dust and rain

Our Temporary Protection Sheet is a blown film of extruded low-density polyethylene that can be used for a variety of applications, including floors, verticals, fixtures and fitting. Temporary protection sheet is manufactured entirely from recycled low density polyethylene, enabling users to protect the work-site accordingly.

Installation - TPS should be installed directly onto clean surfaces to ensure the highest performance of the material

Cut and Fit - Unroll Material and cut to fit the area which is going to be protected. Allow an overlap of at least 150mm to provide a dust free joint when taped securely.

Sizes Available - 4 x 25m
4 x 50m
